General Information

Fullstack Developer with a frontend focus, skilled in **React.js** / **Next.js** and building modern, user-friendly interfaces. Experienced with **Node.js** and **Express** for backend development, delivering scalable APIs and robust architectures.

→ Fun fact: This CV is also coded by me with React/PDF renderer.

Projects

[Lingo](#) [Demo](#)

Full-stack social platform with authentication, friends system, real-time chat/video, and a responsive themed UI.

- Node.js + Express backend with unified API/UI deployment and clean modular routing.
- JWT-based auth flows with MongoDB persistence and secure middleware protection.
- Friends system with API-based friend requests, real-time chat, and video calling via Stream SDK.
- Reliable, themeable frontend powered by React, TanStack Query, Axios, and Tailwind/DaisyUI.

[Wallet App React Native + Expo](#)

A cross-platform (iOS/Android) expense tracker built with React Native and Expo. Real-time balance updates, and an Express + Postgres.

- Secure Auth with Clerk signup/login with 6-digit email verification, plus a smooth logout flow for quick account switching.
- Add income/expenses, live balance updates, delete transactions, and a custom-built pull-to-refresh for Recent Transactions.
- Scalable backend with Express REST API on a Neon Postgres database, cloud-deployed for mobile access, protected by Redis-based rate limiting.

[MusicRewards App React Native + Expo](#)

A cross-platform (iOS/Android) music rewards app built with React Native (Expo Bare Workflow). Users earn points by listening to full tracks with confetti celebration.

- Background audio with React Native Track Player (RNTP) and reward system for completing songs.
- Persistent state via Zustand + AsyncStorage for user, music, and theme preferences.
- Light/Dark mode, confetti modal, and developer tools to clear or log persisted data.
